Talk no. twelve

# TORONTO GEOMETRY COLLOQUIUM

**Marie-Julie Rakotosaona**  
**École Polytechnique**  
“Intrinsic Point Cloud Interpolation  
via Dual Latent Space Navigation”

**Yifan Wang**

**ETH Zurich**

“Detail-Driven 3D Content Creation”

Follow us @GeometryToronto

<https://toronto-geometry-colloquium.github.io>

The Toronto Geometry Colloquium is a live weekly hour-long webseries showcasing geometry processing research. Topics range from computer science, mathematics, and engineering including 3D deep learning, computational fabrication, and computer graphics
